

"Everyone believed that it was impossible, except a fool that did not know it and did it."

Marcel Pagnol

"Do your life a dream and this dream a reality."

Antoine of Saint Exupéry

LUNAYA

Lunaya is a world-wide expedition (40 crossed countries). A matchless adventure mixing a technology of the 70's to the new technologies (numerical, Internet, e-report...) A world tour in DS Break which first goal consists in meeting local populations and developing "cultural and humanitarian" actions.

Actors

The principal actors of the project of which Manuel Boileau and Christelle Mittaut prepare for 2005 a world tour in DS and plan to bring with them a numerical equipment. Their principal goal: crossing the world while realizing a photos and video report on "the childhood of the world". The profits the pictures exploitation will be directly transferred to a humanitarian association (UNICEF).

Challenge

More than a personal challenge, Lunaya is based on symbolic, cultural and humanitarian values where respect and authenticity will be the components of the expedition. An initiatory trip towards the tolerance and the discovery with as backround a magnificent example of efforts and humility. The challenge 1 child + 1 picture = 1 Euro illustrates very well the state of mind of the expedition.
